- Access to our private technical help forum (*24h/24h*)
- Our Newsletter (*Tip, Tricks and Graf news*)

- Graf sites are tested on all important modern browsers (*Mac, IBM*)
- Graf sites are optimized for performance.
- (*SEO*) Optimized for search engines and are Google, Bing, Yahoo verified.
- Integrated Google Analytics
- French and English web sites with multilingual management tools — Administration and sites.
- Internal Firewall.
- Higher server security.
- Internal backup system.
- Advanced editor. (*easily inserts videos, documents, sound, galleries, popup, templates, spelling, etc.*).
- Flexible and advance contact form and integrated Google Map.
- First class hosting services.
- Annual full site and database copy on CD - (*Tested and verified*)
- System of versions recovery to all articles...

### The length and final price for a site are in relation with:

- The motors (*functionality*) asked
- The complexity and level of programming
- The security level needed (*more on commercial web sites*)
- Level of optimization of codes and performances
- Level of optimization for the search engines placement
- etc...

Prices are based on approximately height bilingual pages of material (*16 pages*). The front page of a normal web site is around one page and a half to two page of text and images.

**Note:** For all sites with electronic commerce, the prices don't included the insertion of all products in the virtual store. Another estimation is given, if you want Graf to insert them.
